

Coolflow® pocket innerspring combination systems increase airflow which helps reduce heat and moisture build-up, creating a cooler – and more comfortable – sleep surface.

- **Multi-Layer Comfort** – The open structure of multiple layers of innersprings enhances the natural flow of air and provides softness and support where it's needed.
- **Hi-Low® Coils** – A varying-height coil centre core creates air pockets that maximise air circulation and refresh the unit.
- **High Coil Counts** – These premium-quality, high-coil-count combinations create an exceptional level of progressive support that comforts all body types, weights, and shapes.
- **Quality Steel** – Leggett & Platt draws its own wire to ensure quality-controlled steel in every spring.
- **Packable and Shippable** – Can be compressed, folded, and rolled.\*
