

Narrow-diameter Micro and ultra-narrow-diameter Super Micro pocketed innersprings are a great way to improve comfort resolution by increasing coil counts and overall surface coverage.

- **Responsive** – These narrow-diameter coils respond to the individual contours of the body, maximising support and providing superior levels of comfort.
- **Performance** – Each coil reacts independently, reducing partner disturbance and flexing and responding to all body weights and sleeping positions.
- **Stress-Relieved Wire** – Holds its shape and provides greater durability and performance consistency.
- **Quality Steel** – Leggett & Platt draws its own wire to ensure quality-controlled steel in every spring.
- **Packable and Shippable** – Can be compressed, folded, and rolled.*

Fine Wire Micro and Super Micro pocket springs
