

S-Line high-performance pocket springs deliver the same levels of comfort and support as our standard systems, except they're engineered to be lighter, easier to handle, and deliver real value and advantage.

- **Supportive** – Each pre-compressed coil is consistent, stable, and flexes independently to deliver support where it's needed.
- **Responsive** – Designed to outperform the standard in terms of firmness and optimised performance.
- **Sustainable** – Resilient, lighter in weight, and easier to handle, offering reduced environmental impact and improved sustainability.
- **Stress-Relieved Wire** – Holds its shape and provides greater durability and performance consistency.
- **Packable and Shippable** – Can be compressed, folded, and rolled.

Pre-compressed, next-generation S-Line pocket springs
